

I am experiencing one or more of the following symptoms:

(Please use your mouse to click on the line that best describes your symptoms)

NUMBNESS OR WEAKNESS

- My feet are numb and feel dead
- I don't feel pain in my feet, even when I have blisters or injuries
- I can't feel my feet when I'm walking
- I have trouble feeling heat or cold in my feet or hands
- Sometimes I feel like I have socks or gloves on when I don't

TINGLING

- I feel "pins and needles" in my feet
- My feet or hands get very cold or very hot

PAIN OR INCREASED SENSITIVITY

- I have burning, stabbing or shooting pains in my feet
- My feet are very sensitive to touch. For example, sometimes it hurts when the bed covers touch my feet
- My feet hurt worse at night

If YES...Print this page and discuss with your Physician.

How can Metanx help?^{1,2}

Metanx[®] addresses the distinct nutritional requirements associated with diabetic neuropathy and helps to manage the numbness, tingling and burning sensations in your hands / feet by:

- Maintaining blood flow to the peripheral nerves
- Facilitating peripheral nerve functions such as production of the myelin sheath, a substance that insulates and protects nerve fibers
